## Cambridge Assessment International Education

Cambridge O Level

Paper 1 Multiple Choice

Write in soft pencil.
Do not use staples,
Write your name, centre lum ver and $\mathrm{c} \mathrm{nc}^{\prime}$ ate
unless this has been dor fo you
DO NOT WRITE IN AN BARC DES.
There are forty questions on thinner. Answer all questions Fo each question thre are four poscibte answers A, B, C and D.
Choose the one you consider correct and record your choice in sof pencil on the separat Answer Sheet.
Read the instructions on the Answer Sheet very ca efully.
Each correct answer will score one mark. A mark ill nc be deducted tor a wrong answer.
Any rough working should be done this bo ol let.

This document consists of 16 printed pages.

1 Which reading is given $t$ one tenth of a millimetre?
A 3.3 cm
3.31 cm
C 3.310 cm

D 3.312 cm
$20 \%$

2 A woman runs 2.0 km from $X$ to $Y$ in $>0$ minutes and then rests at $Y$ for 10 minutes. She then takes 10 minutes to run 1.6 km from Y to $Z$.

What ic the size of her average velocity for the journey from $X$ to $Z$ ?
$0.060 \mathrm{~km} /$ minute
B $0.080 \mathrm{~km} /$ minute
C $0.090 \mathrm{~km} /$ minute
D $0.130 \mathrm{~km} /$ minute

3 A cyclist travelling in a straight line at $8.0 \mathrm{~m} / \mathrm{s}$ accelerates to $12 \mathrm{~m} / \mathrm{s}$ in a time of 6.0 s .
Which expression gives the cyclist's acceleration?
A $\frac{6}{12-8}$
B $\frac{8}{12-6}$
C $\frac{12-6}{8}$
$\frac{12-8}{6}$

4 The diagram shows the distance-time graph for a moving object.

What is the moving object?
A a ball thrown vertically upwards and falling back to the thrower
B a car, starting from rest, speeding up as it moves away from a traffic signal
C a rock dropped from a high cliff, falling into the sea below
D a train braking to a halt as it stops at a station

5 Four of the gravitational forces that act between bodies in the Solar System are teed below.
P the force on the Moon due to the Earth
Q the force on the Earth due to the Sun
$R$ the force on the Earth due to the Moon
$S$ the force on the Moon due to the Sun
Which two forces are a Newton's third law pair (action and reaction)?
A P and Q
D $P$ and $R$
C Q and S
D R and S

6 A parachutist of mass 60 kg falls a steady speed of $10 \mathrm{~m} / 0$. The gravitational field strength $g$ is $10 \mathrm{~N} / \mathrm{kg}$.

What is the upward force acting on the parachutist?
A 0
B 6.0 N
C 60 N

$\checkmark$ Res statant for o

7 A force moves a box up a rough slope.
The diagram shows four forces acting on the box.
Which is the force due to friction on the box?

8 The mass of object $P$ is greater than the mass of object $Q$.
The objects contain different amounts of matter and have a different resistance to change of motion.

Which row is correct?

|  | greater amount <br> of matter | greater resistance to <br> change of motion |
| :---: | :---: | :---: |
| A | P | P |
| B | P | Q |
| C | Q | P |
| D | Q | Q |

9 Four objects of different masses are situated in places with different gravitational field strengths.
Which object has the greatest weight?

|  | mass / kg | $\frac{\text { gravitational field strength }}{\mathrm{N} / \mathrm{kg}}$ |
| :---: | :---: | :---: |
| A | 3.0 | 10.4 |
| B | 3.5 | 9.5 |
| C | 4.0 | 10.2 |
| D | 4.5 | 9.0 |

$$
\begin{aligned}
w= & m g \\
& 3 \times 10.4 \\
& 3.5 \times 9.5 \\
& 4.0 \times 10.2 \\
& 4.5 \times 9.0
\end{aligned}
$$

A uniform metre rule is balanced by a 4.0 N weight as shown?

4.0 N

Whats the weight $W$ of the metre rule?

1.0 N

B 4.0 N
C $\quad 16 \mathrm{~N}$
D 40 N

11 A large hook sticks into a pencil. The hook and pencil are balanced on the edge of amer as shown.

Where is the centre of mass of the hook and pencil?

12 The diagram shows a graph of load against extension for a material. At which point is the limit of proportionality?

13 A length of metal wire is made from a radioactive isotope of the metal. The diagram shows masses suspended from the end of the wire.

The masses are removed from the wire.
Which property changes?

A balf-life of the isotope
length of the wire
C mass of the wire
D melting point of the metal $\square$
14 The diagram shower manometer containing mercury that sealed at one end.

What happens to the distance $h$ when the manometer is taken higher up a mountain?

It decreases, because atmospheric pressure decreases with height.
B It decreases, because atmospheric pressure increases with height.
C It increases, because atmospheric pressure decreases with height.
D It increases, because atmospheric pressure increases with height.

15 The pressure on the gas contained in a sealed syringe is slowly doubled halves.

What must be true about the density and the temperature of the gas?

16 An object is lifted.
Which expression gives the increase in gravitational potential energy of the object?
A mass multiplied by its velocity
B mass multiplied by its acceleration
C the rate at which work is done

## $P E=$ neh

D weight multiplied by the increase in height
17 The diagram shows a small car of mass 500 kg approaching a hill. It moves up the kill with constant speed.

The gravitational field strength $g$ is $10 \mathrm{~N} / \mathrm{kg}$.
Ignoring friction, how my work is done in moving the car up the hill?
A $5.0 \times 10^{3} \mathrm{~J}$
D
$5.0 \times 10^{4} \mathrm{~J}$
C $1.0 \times 10^{5} \mathrm{~J}$
D $1.0 \times 10^{6} \mathrm{~J}$

18 Which method of producing electricity does not use an ac. generator?
A geothermal power station

C wave-energy generators
D wind turbine

ac

190 Three solar panels have a total area of $7.2 \mathrm{~m}^{2}$. Together, they produce 1.0 kW of power.

D $80 \%$ の\%
A $11 \%$
B $17 \%$
C $52 \%$

20 A student suggests three different definitions for power.
1 energy transferred per second

2 force $\times$ distance moved
3 rate of doing work
Which definitions are correct?
A 1, 2 and 3
B 1 and 2 only $\qquad$ 1 and 3 only
D 3 only

21 Which statement is correct?
A Infrared radiation cannot travel in a vacuum.
B Infrared radiation cannot travel in solids or in gases.
C Infrared radiation can only travel in a vacuum.
Infrared radiation can travel in a vacuum and in gases.

## 22 How is latent heat defined?

A the thermal energy absorbed or emitted by unit mass during a change of state without a temperature change
B the thermal energy absorbed or emitted by unit mass during unit temperature change
the thermal energy absorbed or emitted during a change of state without a temperature
change
D the thermal energy absorbed or emitted during unit temperature change

23 In low-pressure hydrogen, there are no forces between the molecules except during collisions with each other.

Which statement describes the motion of a molecule between one collision and the next?
A It moves with changing speed and continuously changes direction.
B It moves with changing speed in a straight line.

24 A gas is enclosed in a container of fixed volume.
The gas gains heat energy from an external source.
What happens to the molecules of the gas?
A They expand.
B They move faster inside the container.
C They move further apart.
D They vibrate with greater frequency.
25. wave on water travels towards a stationary boat.

As the wave passes, the boat starts to move up and down and gains kinetic energy from the wave.
Whin property of the wave changes asp the wave passes the boat?
A amplitude
B frequency
C speed
D wavelength

26 Which waves are longitudinal?
A gamma rays
B light waves
ultrasound waves
D X-rays

27 An object is placed at a distance from a converging lens that is equal to twice the focal length of the lens.

Which statement about the image is correct?
A It is enlarged.

C It is on the same side of the lens as the object.
D It is virtual.

28 The lens in the diagram produces an image $I$ of the object $O$.

Why is this not the ray diagram for a photographic enlarger?
A The image is magnified.
The image is virtual.
C The lens is a converging lens.
D The lens is too thin.

29 What is the approximate range of audible frequencies for a healthy human ear?
A 2.0 Hz to 2.0 kHz
B 20 Hz to 2.0 kHz
20 Hz to 20 kHz
D 200 Hz to 200 kHz

30 The speed of sound in air is $c_{a}$, the speed of sound in water is $c_{w}$ and the speed of sound in ice is $c_{i}$.

Which relationship is correct?
A $C_{a}>c_{i}$
B $C_{a}>C_{w}$
C $c_{i}>c_{w}$
D $c_{w}=c_{a}$

> solid > liquid> gas

31 One end of each of two bars is marked with an $X$ or a $Y$, as shown.

bar 1

bar 2

End X of bar 1 is brought close to the N -pole and then to the S -pole of a magnet.
End Y of bar 2 is brought close to the N -pole and then to the S -pole of the magnet.
The table shows what happens.

|  | end X of bar 1 | end Y of bar 2 |
| :---: | :---: | :---: |
| N-pole of magnet | attracted | attracted |
| S-pole of magnet | attracted | repelled |

What materials are bar 1 and bar 2 made from?

|  | bar 1 | bar 2 |
| :---: | :---: | :---: |
| A | copper | iron |
| B | iron | steel |
| C | steel | copper |
| D | steel | iron |

The ignition switch is in a circuit with long, thin wires. The starter motor is in a circuit with short, thick wires.

What is the explanation for the choice of wires?
A Each circuit needs to contain the same total mass of wire.
B Thicker wires heat up more quickly when the relay is switched on.
C Thin wires have lower resistances.
The ignition switch circuit carries a smaller current than the starter motor circuit.

33 The diagram shows a simple circuit.

What happens when the resistance of the variable resistor is increased?
A The lamps are dimmer and the motor rotates more quickly.
8 The lamps are dimmer and the motor rotates more slowly.

All are corrected
$\checkmark$ across wrolur and lamp. decreases. so dimmer

C The lamps have the same brightness and the motor rotates more quickly
D The lamps have the same brightness and the motor rotates more slowly.

34 The diagram shows a simple electrical circuit.

Which statement cannot be correct?
A The current $I$ is 2 A .

The e.m.f. $E$ is 12 J .
C The p.d. $V$ (across the resistor) is 10 V .
D The resistance $R$ is $5 \Omega$.

35 The cable to an electric cooker contains a live wire, a neutral wire and an earth wire. When the cooker is working correctly, in which wires are the currents equal
A the live, the neutral and the earth
B the live and the earth only
C the neutral and the earth only

36 The manufacturer of an electrical heater states that only one heater must be connected to the mains wiring through any fuse.

The current in the circuit with only one heater is 9 A . The fuse rating is 10 A .
Despite the warning, a second identical heater is added, as shown. When the switch is closed the fuse blows.

The fuse is replaced with a 20A fuse.
What happens when the switch is closed?
A Each heater only receives half the correct current.
B Each heater receives twice the correct current.
C The circuit wiring connecting the heaters to the mains may overheat.
D The fuse melts when the heaters are switched on
37 A coil is rotating in a magnetic field. The coil is connected to an oscilloscope. The diagram shows the trace on the screen of the oscilloscope.

The coil now speeds up and rotates twice as foot
Which diagram shows the new trace?

A

C

D

38 A teacher uses the circuit shown.

The identical lamps $X$ and $Y$ are connected to a low voltage ac. power supply by high resistance $Y$ transmission wires. Both lamps are switched on.

Lamp $X$ is then switched off. Lamp $Y$ stays switched on.
What happens to the voltage and the power supplied to lamp

|  | the voltage supplied <br> to lamp Y | the power supplied <br> to lamp Y |
| :---: | :---: | :---: |
| A | decreases | decreases |
| B | decreases | stays the same |
| C | increases <br> D | increases <br> increases |
| stays the same |  |  |

When $x$ open
when xi ch
Sher $X$ are
both close f Effective
decerars
then AM nos less

39 battery.
Which circuit recharges the battery, using an alternating current (ac.) supply and a diode?

D

bias.
$P=V I$

## 40 A proton has charge $q$ and mass $m$.

What is the charge and what is the mass of an alpha-particle?

|  | charge | mass |
| :---: | :---: | :---: |
| A | $q$ | $2 m$ |
| B | $2 q$ | $2 m$ |
|  | $2 q$ | $4 m$ |
| D | $4 q$ | $2 m$ |
